

## Anchor Tensioner

### Features

- Pulls anchor tight to keep it snug in the bow roller.
- Takes weight off the windlass and prevent accidental deployment of anchor.
- Cam action offers up to 150kg of tension with minimal effort.
- No need to drill holes – uses existing cleat or bollard.
- Huge 500mm of adjustability.
- Self locking lever with quick release pin for added peace of mind.
- Fits 7-12mm (¼" - ½") chain.
