

**DESCRIPTION:**

Presta Marine Ultra Cutting Crème is a cutting compound developed to remove P1500 and finer dual action or wet sand scratches from painted gel coat surfaces, marine coatings, clear coat and automotive finishes. This advanced formula makes compounding much easier. It is also the ideal choice for detailing / valeting severely weathered and oxidized finishes.

**DIRECTIONS:**

- Apply a 1" (25 mm) dab of Ultra Cutting Crème for a 2' x 2' (.6m x .6m) section.
- Buff at 1600 to 2400 rpm. Work the buffer side to side slowly, and front to rear, until most of the product is gone and gloss appears.
- Add more Ultra Cutting Crème if you have deeper scratches to remove.
- Wipe surface with a Presta micro fiber cloth #800135.
- Follow with Presta Ultra Polish #1335 for a high-gloss finish.
