

UFLEX UNVEILS NEW ENHANCEMENTS WITH THE UC128-TS

UFLEX USA introduces an intensification of the hydraulic cylinder range for high horse power outboard engines. Advancing from the *UC128-OBF*, the **UC128TS** is defined by improved performance and enhanced durability for hydraulic steering on outboard engines. 300hp single engine single cylinder applications, and up to 600hp on dual engine dual cylinder applications. With a reengineered design, the **UC128TS** is the ultimate solution for steering systems and upgrading existing steering systems.

WHAT'S NEW:

KEY FEATURES: *UC128-TS*

- Bullhorns use our latest technology to galvanically isolate tilt tube & eliminate friction.
- Next-generation end cap design featuring more efficient linear bearing & upgraded end seals with wiper.
- Ultra-low friction & wear resistant stainless steel chrome plated rod for further durability & performance
- Electropolished & passivated arm link for maximum corrosion resistance.
