

CLASSIC FLOTATION COAT (MC1506 XX)

MUSTANG SURVIVAL WE SAVE LIVES FOR A LIVING

FLOTATION AND HYPOTHERMIA PROTECTION WITH SOLAS REFLECTIVE TAPE

The MC1506 is based on the original Mustang Floater Coat, the Classic Flotation Coat is engineered to provide comfort, warmth, and durability. Most importantly, the Coat's closed-cell foam insulation will provide flotation and in-water insulation to delay the onset of hypothermia in the event of accidental water immersion. Combined with functional elements such as large front pockets and a full-length storm flap, the Classic Coat adds up to an unbeatable value.

This coat suits a variety of requirements for the Industrial, Regulatory, and Military environments. The Classic Flotation Coat is a standard piece of uniform for many government agencies.

Beginning November 24, 2008, the Federal Highway Administration (23 CFR 634) Highway Patrol Safety Regulation mandates that anyone working in the right-of-way of a federal-aid highway must be wearing high-visibility clothing that meet the requirements of ANSI/ISEA 107; 2004 edition class 2 or 3.
